

# Forensic Edition Store and Forward Telemedicine Software

## PROFESSIONAL

The Forensic Edition of Second Opinion Professional features a fully customizable forensic exam entry form and a series of forensic reports. It allows you to collect forensic exam information in a database for future analysis. The exam form includes Demographic Data, Assault history, Forensic Exam results and Specimen Data. It also allows you to print summary or detailed reports to Microsoft Word where they can be edited and formatted to meet your specific requirements. These reports can include forensic illustrations as well as specific images captured during the exam. The final version of the forensic report can be saved, printed, and transported using both realtime and store & forward technologies to remote locations for a second opinion.

Secured web viewing of the forensic exam report is also available using Second Opinion WebAccess.
